1 About the Faculty of Agricultural and Environmental Sciences, including School of Dietetics and Human Nutrition

The Faculty of Agricultural and Emironmental Sciences is committed tocellence in teaching, research and service to ensure that husn pretyent and future food, health and natural resource needs are met while protecting it bereent.

2 History of the Faculty

Dedicated to improving the quality of life in Quebes rural communities, Si William Christopher Macdonald founded the School of Household Science at Macdonald © will EteAnne de Belleue in 1906. Macdonald Cotte opened its doors to students in 1907 and its rst degrees were waarded in 1911 The School for eachers became the dulty of Education in 1965 and wood to the downtown campus in 1970. Currently the Macdonald Campus is home to always of Agricultural and Environmental Sciences, the School of Dietetics and Human Nutrition and the Institute of a rasitology The Faculty is comprised of the Departments of the Science, Bioresource Engineering of Science and Plant Science and Plant Science of the founding members of the McGill School of members and is also home to the firm Management and chronology Program The current enrolment is ver 1500 undegraduate and graduate students.

3 Macdonald Campus Facilities

3.1 Morgan Arboretum

The MorganArboretum has 245 hectares of managed and natorizalizands, elds and tree plantations used for irremmental research and teaching in a wide range of courses. Eighteen formal tree collections contain groups of most Canadianne waitiand magnuseful and important vertices. In addition, ov

5 About the Faculty of Agricultural and Environmental Sciences, including School of Dietetics and Human Nutrition (Undergraduate)

The Faculty of Agricultural and Exironmental Sciences and the School of Dietetics and Human Nutrition are located on Mo@ilstyris Macdonald Campus, which occupies 650 hectares in a beautiful from the western tip of the island of Montreal.

Students can earn internationally recognized less in the elds of agricultural sciences and applied biosciences, food and nutritional sciences, ental sciences, and bioresource engineering. Students ha opportunity in all programs, to study abroad in places sucha anna, Barbados Africa. Students may also have the opportunity to participate in internships.

Macdonald is a erry diverse and international campus. Students are taught by outstanding professors who are among the top in Theircæridssus has excellent facilities for teaching and research, including well-equipped laboratoxipes; inequal farm and eld facilities, and the Mogran Arboretum. The campus is surrounded by the Outta

5.3 Faculty Admission Requirements

For information about the admission requirements for taisuffy please refer to then degraduate Admissions Guidefound atwww.mcgill.ca/applyingHons.)(Car

5.4.4 Student Life

All undergraduate, postgraduate, anathin Management antibechnology students are members of the Macdonald Campus Students' SbeiMCSS, through the 18-member Students' Council, visilived in numerous campus avitties such as social/vents, academic fafirs, and the coordination of clubs and oganizations. Student life is informal and friendly and student groups range from the Ontrology of the Photograp Society Major social events include Orientation acti

and deadlinespests with yoult is your responsibility to seek guidance if inyadroubt; misunderstanding or misapprehension will not be accepted as cause for dispensation from agreegulation, deadline, program orgree requirement.

5.5.1 Minimum Credit Requirement

You must complete the minimum credit requirement for yogræteas speci ed in your letter of admission.

Students are normally admitted to a forear program requiring the completion of 120 creditist, and anced standing of up to 30 credits may be granted if you obtain satisfactory results in the Diploma of Codinal Studies, International Baccalaureate, French Baccalaureate, and Advanced Placement tests.

Normally, Quebec students who weacompleted the piplôme d'études collegales (DEC) or equialent diploma are admitted to the rst year of a program requiring the completion of a minimum of 90 credits, 113 credits for Bioresource Engineering, 115 credits for Dieteties management and 122 credits for the Concurre of the Con

Students from outside Quebec who are admitted on the basis of a high school diploma enter the Freshmanich significant prises 30 credits (seection 7.1: Freshman Majoin this publication).

You will not receive credit toward your degree for an course that verlaps in content with a course successfully completed at McGill, at anothersity at CEGEPor Advanced Placements Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate.

If you are a student in the B.Sc.(AgvEsc.), you must taka minimum of two-thirds of your course credits within the dulty of Agricultural and Exironmental Sciences.

5.5.2 Minimum Grade Requirement

You must obtain grades of C or better ity aequired, complementary and freshman courses used to ful I program require/rounts you have not passed all the prerequisite courses with a grade of C or beateur by written permission of the Departmental Chair concerned.

5.5.3 Academic Advisers

Upon entering the aculty and before gestering, you must consult with the ademic Adviser of your program for selection and scheduling of required, complementar, yand electie courses The Academic Adviser will normally continue to act in this capacity for the duration of your studies in a thusty.

A FacultyAdviser is also vailable in the StudenAffairs Of ce to assist you with student record related matters.

5.5.4 Categories of Students

5.5.4.1 Full-Time Students

Full-time students in satisactory standing taska minimum of 12 credits per term. (A normal course load is considered to be 15 credits per term.)

Students in Probationary standing are not normally permitted a than 14 credits per term. In the permitted and the committed and the commit

5.5.4.2 Part-time Students

Part-time students carry wher than 12 credits per term.

5.5.14 Degree Requirements

To be eligible for a B.Eng. (Bioresource), B.Sc. (Agulac.), B.Sc. (Fsc.), or Concurrent B.Sc. (Fsc.) and B.Sc. (Nucsc.) degree, you must have passed, or achieved exemption, with a minimum grade of C in all required and complementary courses of the phogramust also have a CGA of at least 2.00.

In addition, if you are a student in the Dietetics program, you muet doampleted the Stages of professional formation requiring a QCEP.00.

You must have completed all acculty and program requirements; see steetion 5.5.1Minimum Credit Requirementsection of this publication.

In order to qualify for a McGill degree, you must complete a minimum residerequirement of 60 credits at McGill. If you are in the B.Sc.(Ag. Scn.), you must take a minimum of 2/3 of your course credits within the uffity of Agricultural and Enironmental Sciences.

5.5.15 Dean's Honour List

For information on the designation of Deathonour List warded at graduation, see theiversity Regulations and Genet Information> Dean's Honour List section in this publication.

5.5.16 Distinction

For information on the designation of Distinctionarded at graduation, selections and Genet Information Distinction this publication.

5.5.17 Honours and First Class Honours

Departments may recommend to that fractifity that graduating students jistered in an Honours program becauded Honours or First-Class Honours under the following conditions:

you must complete all Honours program requirements; for Honours, the angleaduation must be at least 3.00;

for First-Class Honours, the C& at graduation must be at least 3.50;

some programs may impose additional requirements, which must be met before you are recommended for Honours or First-Class Honours.

Students in an Honours program whose **£G**Pbelow 3.00 or who did not satisfy certain program requirements must consult their academic adviser to determine their eligibility to graduate in a program other than Honours.

5.5.18 Medals and Prizes

Various medals, scholarships and prizes are open to graduating students. No application is required. Full details of these are **isetle of raditate** Sc

6.13.1 McGill School of Environment (MSE)

The MSE is a joint initiatie of the Faculty of Agricultural and Emironmental Sciences, the Faculty of Arts, the Faculty of Science, and the Faculty of Law. It offers a B.Sc. (Ag. En.Sc.) Major in Emironment, a B.Sc. Major in Emironment, a B.A. & Sc. Interfaculty Program in Emironment, a B.A. Eculty Program in Emironment, a Minor in Emironment and a Diploma in Emironment. Many of the MSE programs alwayou to choose to study edusively on the Macdonald or dontown campuses, or to talk advantage of both.

A list of the B.Sc.(Ag.En.Sc.) Domains is gien undersection 7.2Bachelor of Science (Agricultat and Environmental Sciences) B.Sc.(Agm.Sc.) Further information on all programs is gin under McGill School of Environmentand on the MSE websitewww.mcgill.ca/mse

6.13.2 Environmental Programs on the Macdonald Campus

A number of integrated enironmental science programs are alsered on the Macdonald Campus, particularly within the B.Sc.(AgSEn) and B.Eng.(Bioresource) deseas. The objective of these interdepartmental programs is twipted on the well-rounded training in a specie interdisciplinary subject as well as the basis for managing natural resources. Emplete list of the programs, sees tion 6 Overview of Programs Offered by the Eculty of Agricultural and Environmental Sciences

7 Academic Programs

Degree programs at the ungleaduate leel in the Faculty may lead to a B.Sc. gree in Agricultural and Enironmental Sciences (Ag. EuSc.), Food Science (F.Sc.), Nutritional Sciences (Nusc.) or a B.Eng. degree in Bioresource Engineering Faculty also degrees students the possibility to do concurrent B.Sc. degrees in both Food Science and Nutritional Sciences.

7.1 Freshman Major

Program Director

Dr. Marcia Knutt

Program Director

Telephone: 514-398-7976

The Freshman Program is designed to interpreted a basic science foundation to students entering using for the rst time from a high school system (outside of the Quebec CEGEP system) he Freshman fear consists of at least 30 credits in fundamental math and science courses as preparation for one of the following degree programs:

B.Sc. (Agricultural & Enrironmental Sciences)

B.Eng. (Bioresource)

B.Sc. (Nutritional Sciences)

B.Sc. (Food Science)

Concurrent B.Sc. (Fod Science) and B.Sc. (Nutritional Sciences)

Note: If you are not certain that you wead equate math and/orystics skills to commence the freshman year you may wish explain paratory courses prior to the normal fall semester ou are encouraged to discuss your potential need with your academic. Add the matter matical skill level will be determined during the rst week of classe your freshman adviser may recommend that y gister for an additional weekly 67846/51c/3 which was the required credits of the grown program.

FreshmanAdviser: Dr Alice Cherestes

Macdonald-Sterart Building, Room 1-023

Telephone: 514-398-7980

Required Courses - Fall (14 credits)

AECH 110	(4)	General Chemistry 1
AEMA 101	(3)	Calculus 1
AEPH 112	(4)	Introductory Physics 1
AGEC 200**	(3)	Principles of Microeconomics

Required Courses - Winter (13 credits)

AEBI 122	(3)	Cell Biology
AEHM 205	(3)	Science Literage
AEMA 102	(4)	Calculus 2
AGEC 201**	(3)	Principles of Macroeconomics

Complementary Courses - Winter (3 credits)

One of the following:

AGRI 120	(3)	Exobiospheres
BREE 103	(3)	LinearAlgebra
NUTR 301	(3)	Psychology

Advising Notes:

^{*} Freshman students intending to majoAigricultural Economics in the B.Sc. (Ag. & ErSci.) degree program should note that the couAsESI 120

Elective - Winter (3 credits)

Revision, Fall 2010. End of revision.

7.1.4 Bachelor of Science (Nutritional Sciences) (B.Sc.(Nutr.Sc.)) - Freshman Program (30 credits)

Revision, Fall 2010. Start of revision.

If you are entering unversity for the rst time from a high school system (outside of Quebec CEGEP system) you will be required to complete a freshman year of at least 30 credits as listed buelo

Normally, students resistered in the faculty of Agricultural and Environmental Sciences Freshman program may taknaximum of 8 credits outside the Faculty of erings to meet the requirements of the program. Permission to registration.

Students require a minimum 2.50 CAGIP order to progress introcar 1 of the Dietetics program.

Note: If you are not certain that you wead equate math and/orysics skills to commence the freshman year you may wish explain paratory courses prior to the normal fall semester you are encouraged to discuss your potential need with your academic. Adartsematical skill level will be determined during the rst week of classes your freshman adviser may recommend that your encouraged to discuss your potential need with your academic. Adartsematical skill level will be determined during the rst week of classes your freshman adviser may recommend that your encouraged to discuss your potential need with your academic. Adartsematical skill level will be determined during the rst week of classes your freshman adviser may recommend that your encouraged to discuss your potential need with your academic. Adartsematical skill level will be determined during the rst week of classes your freshman adviser may recommend that your encouraged to discuss your potential need with your academic. 7.2.3.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) - Major Agro-Environmental Sciences (42 credits)

This major is focused on the idea that agricultural landscapes are managed ecosystems, and that **agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agentins agenti**

The program has a strong eld component that includes hands-on laboratories, visits to agricultural enterprises, and opportunities for internships. Classe and laboratoriesxploit the unique setting and dilities of the Macdonald Campus and me, which is a fully functioning from in an urban setting that exempli es many of the issues at the forefront of modern agricultural production. Graduates of this program are eligible to become members of the Ordre des agronomes du Québec.

Program Prerequisites

Please refer to aculty Information and Reulations > Minimum Credit Requirements, in this publication for prerequisites and minimum credit requirements.

Required Courses (36 credits)

AEBI 210	(3)	Organisms 1
AEHM 205	(3)	Science Literayc
AEMA 310	(3)	Statistical Methods 1
AGEC 200	(3)	Principles of Microeconomics
AGEC 231	(3)	Economic Systems of griculture
AGRI 215	(3)	Agro-Ecosystems Field Course
ANSC 250	(3)	Principles of Animal Science
ENVB 210	(3)	The Biophysical Environment
LSCI 204	(3)	Genetics

LSCI 211	(3)	Biochemistry 1
LSCI 230	(3)	Introductory Microbiology
SOIL 315	(3)	Soil Fertility and Fertilizer Use

Complementary Courses (6 credits)

6 credits of Complementary courses selected asvisilo

One of:

PLNT 300	(3)	Cropping Systems
PLNT 302	(3)	Forage Crops and Stures

One of:

ANSC 451	(3)	Dairy and Beef Production Management
ANSC 458	(3)	Swine and Poultry Production

Specialization

Choose at least one specialization of 18 - 24 credits

Specializations designed to be takwith the Agro-Environmental Sciences Major:

- Agricultural Economics
- Animal Health and Disease
- Animal Production
- EcologicalAgriculture
- Entomology
- InternationaAgriculture
- Plant Production
- Plant Protection
- ProfessionaAgrology
- Soil andWater Resources

Electives

To meet the minimum credit requirement for thgree.

7.2.4 B.Sc.(Ag.Env.Sc.) En vironmental Biology Major

Program Director

Professor Chris Buddle

Program Prerequisites

Please refer to aculty Information and Rgulations > Minimum Credit Requirements, in this publication for information on prerequisites and minimum credit requirements.

Required Courses (30 credits)

AEBI 210	(3)	Organisms 1
AEBI 211	(3)	Organisms 2
AEBI 212	(3)	Evolution and Phologeny
AEHM 205	(3)	Science Literayc
AEMA 310	(3)	Statistical Methods 1
ENVB 210	(3)	The Biophysical Environment
ENVB 222	(3)	St. Lawrence Ecosystems
ENVB 410	(3)	Ecosystem Ecology
LSCI 204	(3)	Genetics
LSCI 211	(3)	Biochemistry 1

Complementary Courses (12 credits)

12 credits of complementary courses selected from:

AEBI 451	(3)	Research Project 1
AEBI 491	(1)	Scienti c Communication
AEMA 406	(3)	Quantitative Methods: Ecology
ENTO 340	(3)	Field Entomology
ENVB 301	(3)	Meteorology
ENVB 305	(3)	Population & Community Ecology
ENVB 313	(3)	Phylogeny and Biogeograph
ENVB 315	(3)	Science of InlandVaters
ENVB 430	(3)	GIS for Natural Resource Management
ENVB 437	(3)	Assessing Evironmental Impact
ENVR 203	(3)	Knowledge, Ethics and E⁄ir onment
LSCI 230	(3)	Introductory Microbiology
MICR 331	(3)	Microbial Ecology
PLNT 304	(3)	Biology of Fungi
PLNT 358	(3)	Flowering Plant Dirersity
SOIL 300	(3)	Geosystems
SOIL 326	(3)	Soils in a Changing Exironment
WILD 307	(3)	Natural History of Vertebrates

Specialization

At least one specialization of 18-24 credits

Specializations designed to be takwith the Enironmental Biology Major:

- Applied Ecosystem Sciences
- Entomology
- Environmental Biology (Multidisciplinary)
- Plant Biology
- Plant Protection
- Soil andWater Resources
- Wildlife Biology

Note: For a complete list of specializations confed for students in the Bachelor of Science Agricultural and Emironmental Sciences, please refer to Academic Programs > Bachelor of Science (Agricultural and furmental Sciences) - B.Sc.(Agricultural and Emironmental Scienc

7.2.7.17 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) - Microbiology (24 credits)

Students following this specialization reose education and training in fundamental principles and applied aspects of microbiology ementary courses allow students to focus on basic microbial sciences or applied areas such as biotec bookers full graduates mayner in university, government and industrial research laboratories, in the pharmaceutical, fermentation and food industries, and with an appropriate capto post-graduate studies or professional biomedical schools.

7.2.7.24 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) - Wildlife Biology (24 credits)

This specialization focuses on the ecology enterorate animals, their biological and place and the interactions that are important in the management of ecological communities and wildlife species. Studenets bases to local wildlife resources including Alviean Science and Consention Centre, the McGillArboretum, the Storcroft Wildlife Area, the Molson Reservand the Ecomuseum.

7.3 Bachelor of Engineering (Bioresource) - B.Eng.(Bioresource)

7.3.1 Bioresource Engineering Major

The Department of Bioresource Engineering collaborates with other departments ancultyed Engineering in produing courses of instruction for a curriculum in Bioresource Engineering. Graduates qualify to apply distretion as professional engineers in province of Canada The professional agrology option quali es graduates to apply fogistration to the Ordre des gronomes du Québec

There are six streams feed within the Bioresource Engineering Majdia the appropriate choice of electicourse sets, a particular area of study may be emphasized. More information about these streams and the suggested course sets for each can be found on the Department we bistered biology.

In the Bio-Envir onmental Engineeringstream, students learn about soil anadew quality management and consider, geomatics, yidrology and water resources, organic waste treatment, use of GIS for biosystem operation, engineering for washedputeent, climate control inubidings, ecosystem remediation, and many other related topics.

Students who follow the Soil and Water stream learn about/drology, irrigation and drainage, soil and the management, vironmental quality control and remediation, structural design, machinery design, arti cial intelligence, GIS, and remote sensing.

In the Ecological Engineeringstream, students learn who apply principals of engineering and ecology to the design and implementation of comple ecological systems. They learn how to create systems that presseand enhance natural ecological processes as a means of ful lling design requirements.

In the Food and Bioprocessingstream, students are taught about the engineering of foods and food processing, properties of biological materials, post-harest technology fermentation and bio-processing, the management wastes, biotechnology he design of machinery for bioprocessing, etc.

Students who specialize in the gricultural Engineering stream will learn about machine design, machine the time the time that the gricultural design, with the time that t

The Professional Agrology option of ers a course selection guided to qualify graduates (bistration as professional agrologists with (Direl re des agronomes du Québec

All required and complementary courses must be passed with a minimum grade of C. One term is spent taking coursescultyndh Erfgineering on the McGill downtown campus.

Students also we the opportunity to pursue a Min Several possibilities are gricultural Production, Evironment, Ecological griculture, Biotechnology Computer Science, Construction Engineering and Management, Entrepreneurship intermediate Engineering. Details of some of these Minors can be found under a culty of Engineering. Minor Programs To complete a Minorit is necessary to spend at least ortenderm by ond the normal requirements of the B.Eng. (Bioresource) program.

See section 5.5.1Minimum Cedit Requiement for prerequisites and minimum credit requirements.

7.3.2 About the B.Eng. (Bioresource) Program

Bioresource Engineering is the unique branch of engineering that includes Biological engineering and Bioengineering where professional engineering practi intersects with biological sciences. Bioresource Engineers design, vienquid manage biological-based systems to operate in ef cient and sustainable w for the well being of the wironment and society

7.3.3 Bachelor of Engineering (Bioresource) (B.Eng.(Bioresource)) - Major Bioresource Engineering (113 credits)

7.4.3.1 About the Concurrent Bachelor of Science in Food Science (B.Sc.(F.Sc.)) and Bachelor of Science in Nutritional Sciences (B.Sc.(Nutr.Sc.)) Program

Unique in NorthAmerica, the new concurrent degree program in God Science and Nutritional Science the best education in these complementary elds and opens the door to a multitude of career paths.

The Food Science component of the program focuses on the chemistry of food and the scientic principles underlying food times processing and packaging to proide consumers with quality food the Nutritional Science component deals with the science of the nutritional aspects of food and metabolism. The program has been carefully structured to ensure that students the draining that industry demands.

21 credits of Electries are taken to meet the minimum credit requirement for the rele. Reciprocal agreement sulks all students to take limited number of electives at any Quebec unviersity. With prior approval students can takelectives at any Canadian or international unwirsity.

Revision, Fall 2010. End of revision.

Bachelor of Science (Nutritional Sciences) (B.Sc.(Nutr.Sc.)) - Major Nutrition - Nutritional Biochemistry (90 credits) 7.5.7

Revision, Fall 2010. Start of revision.

This major covers the may aspects of human nutrition and food and girst, an education in the scientic fundamentals of these disciplines and second, an opportunity to focus in (a) nutritional biochemistry and metabolism, (b) global nutrition issues, (c) food function, pvetupndent and safety and/or (d) sports nutrition. Graduates are quali ed for careers in pharmaceutical and/or food industrives megot laboratories, the health science communications eld, sports clinics and national or international food support programs. Graduates often continue on to further studies preparing for careers in research, medicine, and dentistry or as specialists in nutril axide from working as university teachers and researchers, postgraduates may be controlled in nutril axide from working as university teachers and researchers, postgraduates may be controlled in the controlled from working as university teachers and researchers, postgraduates may be controlled from working as university teachers and researchers, postgraduates may be controlled from working as university teachers and researchers, postgraduates may be controlled from working as university teachers and researchers, postgraduates may be controlled from working as university teachers and researchers, postgraduates may be controlled from working as university teachers and researchers. and health protection agencies, iorlad development programs or in the food sec(Qurrently under resion)

Please refer to aculty Information and Reulations > Minimum Credit Requirements, in this publication for prerequisites and minimum credit requirements.

7.6.1 Bachelor of Science (Agricultural and Environmental Sciences) (B.Sc.(Ag.Env.Sc.)) - Minor Agricultural Production (24 credits)

This minor program is designed to allestudents in non-agricultural production majors to received it for courses in agricultural production and to stimulate "cross-over" studies. The Minor can be associated with agricultural programs in the Eulty, but in some instances it may require more than 90 credits to meet the requirements of both the major and the minor

Students are advised to consult their major program adviser and the academic adviser of the minor in theiAtr**theyeian**e of registration for their penultimate yearstudents must declare their intent to obtain a Magnicultural ProductionWith the agreement of their major program advisey thest submit their program of courses alreadyetaland to be taken in their nal yearto the academic adviser of the gricultural Production Minor The academic adviser of the Agricultural Production Minor will then certify which courses the student will apply to

AcademicAdviser: Professor Roger Cue

Required Courses (15 credits)

ANSC 312	(3)	Animal Health and Disease
ANSC 323	(3)	Mammalian Plasiology
ANSC 324	(3)	Developmental Biology and Reproduction
ANSC 420	(3)	Animal Biotechnology
PARA 438	(3)	Immunology

Complementary Courses (9 credits)

A minimum of 9 credits selected from the following list:

AEBI 451	(3)	Research Project 1
ANSC 251	(3)	Compara t ie Anatomy
ANSC 326	(3)	Fundamentals of Population Genetics
ANSC 330	(3)	Fundamentals of Nutrition
ANSC 400	(3)	Eukaryotic Cells an Viruses
ANSC 424	(3)	Metabolic Endocrinology
ANSC 433	(3)	Animal Nutrition
ANSC 560	(3)	Biology of Lactation
ANSC 565	(3)	Applied Information Systems

7.6.3 Minor Animal Health and Disease (24 credits)

Revision, Fall 2010. Start of revision.

The minor inAnimal Health and Disease is ferfed to students wishing to understand general aninys logibgy and function, the susceptibility of animals to various diseases, methods for limiting and controlling potential outbreaks, and the resulting implications for the animal, the consumer animal trial is an ideal choice for students who are interested in the care of animals, containing win laboratories where diseases are being research and be useful to students who wish to apply to mester in North America.

This minor is not open to students in B.Sc.(Agv.So.) programsThese students maygieter for the specialization Animal Health and Disease.

AcademicAdviser: Professor Sarah Kimmins Macdonald-Sterart Building, Room 1-091

Complementary Courses*

Students must tækthe following complementary courses to meet the program requirements:

* After consultation with their academic advissatudents can substitute complementary courses task another collegial institution. This includes science courses which are required for further studies in garacter programThe cost associated with courses task less where must be assumed by the students.

FMTP 096	(2)	Forests, Forestry and Society (305-032-MC)
FMTP 097	(2)	Landscape Design (504-VSG-MC)

Comprehensive Assessment

McGill University 89

FACULTY OF AGRICULTURAL AND ENVIRONMENTAL SCIENCES, INCLUDING SCHOOL OF DIETETICSND HUMAN NUTRITION

The objective of this examination is to ensure that students that students that object is and standards for each competent the program. Successful completion of the Comprehensei Assessment is mandatory to obtain the D.E.C.

The passing grade is 60% mark indicating that the student has successfully completed the Comprehensisment will appear on the student's transcript.

English Exit Examination

All students who wish to graduate and obtain the D.E.C. must pass the English Exit Examinationf#redispythe M.E.L.S. Students mustetakis examination on the date selected by the M.E.L.S.

9.4 Entrance Requirements FMT

- 1. Students should **tre** a good practical **knod**edge of farming under eastern Canadian conditions. One yeaxperience is recommended thunder special conditions a fournonth summer season is acceptable.
- 2. The minimum academic entrance requirements are a Quebec High Schologl@arti cate (Secondary), or its equivalent and another academic requirement set by the M.E.L.S.
- 3. All candidates for admission must meakurrangements to come to the Macdonald Campus for an integrition to admission to the program.
- 4. Admission to this program is only in thalFsemester
- 5. We strongly encourage incoming students to acquire the peretripermit (both for carsend farm equipment) before coming to Macdonald Campus. This is rst for safety reasons, we in that students work with farm equipment (Soil Preparation) early on as the arrive at Macdonald well, most farmers require that their emplaces and stagiaires known to drive and possess the appropriate extributions.

9.5 Registration FMT

Students in the Arm Management and behnology Program mustgister online using Mineavatwww.mcgill.ca/minervafor each semester at McGill.

Note: The University reserves the right to markchanges without prior notice to the information contained in this publication, including the alteration of various fees, schedules, conditions of admission and credit requirements a wishing one cancellation of particular courses. In normal circumstances, invalidual courses will not be ferred with less than vergistrants.

9.6 Academic Rules and Regulations FMT

The Farm Management antibechnology Program follows the rules and goalations of McGill University as well as from the linistère de l'Éducation, du Loisir et du Sport du Québéor the collegial level.

9.6.1 Sessional Dates - FMT

The number of teaching and ammination days is set by tild inistère de l'Éducation, du Loisir et du Sport du Quédite sessional date any from year to year At the present time, each semester has 75 teaching days and 7 days and 7 days and 7 days and 7 days and 8 days and 9 days

9.6.2 Last Day for Withdrawal or Course Additions

The last day to makecourse resistration changes foraff term courses is September 20.

The last day to markcourse registration changes for finite term courses is February 15.

9.6.3 Academic Standing - FMT

Attendance in class is compulso 8 tudents with attendance of less than 80% may not be permitted toxentien ations.

Examinations and otheronk in courses will be maded according to the percentage systeme minimum passing mark in a course is 60%.

When a student's cumulæti percent værage (CR) or semestrial percent værage (SR) rst drops below 60%, or the fail four or more courses in a semesterwithdrawal is advised. Students who choose to remain in the program are on probation.

Students on probation are normally permitted **trisite** for not more than 10 credits per seme trees are not permitted to be on probation for more than one semester unless the trial and SR of 70% or higher

Students who do not raise their ICR 60% (or obtain an SPPof 70%) while on probation are not permitted to continue are required to withdra from the Program for one yeals, after this period, students wish to be readmitted, these apply in writing to the Director of the Program.

9.6.4 Handbook on Student Rights and Responsibilities

This Handbook is a compendium of the tions and policies gerning student rights and responsibilities at McGill\(\mathbb{Mentity}\). It is published jointly by the Dean of StudentsOf ce and the Secretaria\(\mathbb{A}\) copy of the Handbook can be found\(\mathbb{Mentity}\) wmcgill.ca/sec\(\mathbb{E}\) tariat/policies/student\(\mathbb{O}\) row to the Macdonald Campus Student Services Centre.

9.6.5 Institutional Policy on the Evaluation of Student Achievement - FMT

The policy has the following objectives:

- to establish andxplain the principles followed in evaluating student learning;
- to describe the means of translating these principles into practice and to establish the required procedures;
- to articulate the appropriate responsibilities of students, instructors, departments, and academic administrators;
- to account to students, parents, venisities and emploers for the standards of learning at the campus;
- to create an evironment of swareness and free discussion of pedagogical concerns withing rable sits of the campus community;
- to provide information which will allow students to more fully understand and participate in the educational process;
- to provide the framework within which instructors and academic administrators carcise their professional judgment in a competent, just, and coherent ashion.

Copies are vailable in the Library and students are informed of it gisteation.

9.7 Fees and Expenses FMT

9.7.1 Fees

Tuition fees for all full-time students who are eligible for the Management and chnology Program are paid by Ministère de l'Agricultue, des Pêcheries et de l'Alimentation du Québ au dent Services and Student Societies' fees, as well as course material fees, will be actual to the schedule in élect for all Macdonald Campus student time of publishing, the fees* were \$818.60 for the semester and \$673.55 for Whenter semester

* 2009-10 fees, subject to change without notice.

9.7.2 Textbooks and Supplies

The cost of tetbooks and supplies is estimated at \$200.00 per semester

9.7.3 Financial Assistance

In-Course FinanciaAid (including loans and ursaries) is vailable to full-time students on the basis of demonstrated nancial newey them it is recommended that all applicants apply for the maximum region tstudent assistance program for which almeeligible. Students may apply for In-Course FinanciaAid through the FinancialAid Menu on Minera and will then be asked to make an appointment with the Load ministrator who visits the Student Services Centre, Macdonald campuse, we Wednesday to meet with students with nancial dif culties in Financial information seleniversity Regulations and General Information Scholarships and Stude Aid, or contact the Student Services Centre at 514-398-7992.

9.8 Residence Accommodation FMT

The Laird Hall Residence has a capacity of 250 students. It accommodates authorite, graduate, and Management and Compusor Program students on the Macdonald Campusor Improvement information, please refer University Re

12.2 About the Department of Food Science

Food Science's a multidisciplinary eld involving chemistry biochemistry nutrition, microbiology and processing to regione the scientic knowledge to solve real problems associated with the infancets of the food systemo of Science is still a relately new and growing discipline, brought about mainly as a response to the social changes taking place in Alouthica and other parts of the websoped world. The current trend towards meger between food and pharmaceutical industries to produce the new generation of new food products such as functional foods and nutraceuticals is the biggest challenge facing the discipline of of Science today ou can be part of in the programs of the derivative of Science (Food Chemistry or Food Science option) and Concurrent degree which includes B.Sc. of Science/B.Sc. Nutritional Science for more information on these programs, section 7.4 Bachelor of Science (of Science) - B.Sc. of Science)

13.2 About Department of Natural Resource Sciences

The courses and academic programmer of Natural Resource Sciences allodents toxplore interactions among the components of terrestrial and aquatic ecosystems, andegrance through the vizelopment of a strong, interdisciplinary background in fundamental, applied and social sciences.

Our environment is comprised of maninteracting components: interactions between the earth's atmosphere and forests or crops, between plants and othe organisms in the soil, between soil properties and nutrieratisable to plants, betweenegetation and the wildlife it supports, between ecological communities on the land and those of there is and lakes nearby between microbial granisms and food safety and disease, between insects, plants and animals, between human activities such as agriculture, forestry and industriar between and natural ecological processes. In turn, all these processes are greatly af by the actions of greenments that rely primarily on feedback from societal and industrial groups, economists, and provide guidelines for the management of our natural resources.

Donald L. Smith

Alan K. Watson

Associate Pofessors

Jacqueline C. Bede

Sylvie de Blois

Danielle J. Donnelly

Marc Fortin

Suha Jabaji

Ajjamada C. Kushalappa

Philippe S**g**uin

Katrine A. Stewart

Martina

15

Lecturers

Peter Bender (PT)

Lynda Fraser (PT)

Mary Hendrickson

Linda Jacobs Stack

Maureen Rose

Joane Routhier

Sandy Phillips

Hugues Plourde

Heidi Ritter

Adjunct Professors

Mary I Abbé

Kevin A. Cockell

Cross-Appointed Staff

Food Science an Algricultural Chemistry: Selim Krmasha

Medicine: Louis Beaumie Franco Carli, Stephanie Chadier, Réjeanne Gougeon, L. John Houf Larry Lands, Errol Marliss, José Mora Tshomas

Schricler, Jean-Françoisale, Ralph Lattermann

Parasitology: Marilyn E. Scott

MUHC: Sonya Page

16 Institute of Parasitology

16.1 Location

Institute of Parasitology
Macdonald Steart Building Room MS3-040
McGill University, Macdonald Campus
21,111 Lak

Professors

John Dalton

Timothy Geary

Roger Prichard

Associate Pofessors

Charron, Jean-Benoit; B.Sc.(Montr

Lewis, David J.; B.Sc., M.Sc., Ph.D.(MemAssociate Dean (StudeAffairs) and Associate Professor of Entomology

Lussier Sege; B.Sc.(Agr)(McG.); Assistant Director and aculty Lecturer Farm Management an Technology Program

Madramootoo, Chandra; B.Sc. (Algng.), M.Sc., Ph.D. (McG.); Png., Dean James McGill Pofesso)

Marquis, Grace S.; B.A.(Ind.), M.Sc.(Mich. St.), Ph.D.(C'nells)sociate Professor of Human Nutritio@a(nada Resealn Chair)

Marshall, William D.; B.Sc. (New Br.), Ph.D. (McM.); Professor of God Science an Algricultural Chemistry

McClintock, Katherine; B.A.(Velles.), B.Sc.(Agt), M.Sc.(McG.); Faculty Lecturer Department of Plant Science

McKyes, Edvard; B.Eng., M.Eng., Ph.D.(McG.), G.S.A.E.; Professor of Bioresource Engineering

Moffat, Donald; B.Ed.(IE.)(McG.), Grad. Dip. in Sportadmin.(C'dia); Faculty Lecturer (PT), firm Management an Technology Program and Coordinator Campus RecreationAthletics and Recreation

Molgat, Christian; B.Sc.(Guelph), B.Sc.(Ott.)adulty LecturerFarm Management andechnology Program

Monardes, Humberto G.; B.Sc.(Concepcion, Chile), M.Sc., Ph.D.(M&Ss)gciate Professor Afnimal Science

Mustafa, Arif F.; B.Sc., M.Sc. (Khartoum), Ph.D. (SaskAssociate Professor Afnimal Science

NaseemAnwar; B.Sc.(McG.), M.A., M.Sc.(Penn.), Ph.D.(Mich. SAssistant Professor Agricultural Economics

Ngadi, Michael O.; B.Eng. (Nigeria), M.A.Sc., Ph.D. (NaoScotiaTC.); Associate Professor of Bioresource Engineer inhibitiam Dawson Sholar)

Orsat, Valerie; B.Sc., M.Sc., Ph.D. (McGAssistant Professor of Bioresource Engineering

Phillip, Leroy E.; B.Sc.(Agr), M.Sc.(McG.), Ph.D.(Guelph) ssociate Professor Afnimal Science

Phillips, Sandra; B.A.(Qu.), B.Sc.(₹c.), M.Sc.(McG.); €culty Lecturer (Stage), School of Dietetics and Human Nutrition

Plourde, Hugues; B.Sc.(Nutsci.)(McG.), M.Sc.(Nut)(Montr.); Faculty Lecturer (Stage), School of Dietetics and Human Nutrition

PrasherShiv O.; B.Tech., M.Tech.(Punjab), Ph.D.(BCol.); Professor of Bioresource Engineering and Chair of Departorement McGill Professor

Prichard, Roger K.; B.Sc., Ph.D.(N.S)WProfessorInstitute of Parasitology (
